Amendment 36

First part 'A Member State may request the Commission to authorise a temporary derogation of the application of this Regulation for goods listed in Annex I imported into such outermost regions referred to in Article 349 TFEU and destined exclusively for local consumption or local processing.' without the word: 'temporary'

Second part 'temporary'

Third part 'The temporary derogation referred to in the first paragraph (the 'request') shall be granted only where the Member State demonstrates, on the basis of verifiable evidence, that:

(a) application of this Regulation would entail disproportionate socio-economic impacts in the outermost region concerned;

(b) no viable alternative supply from within the customs territory of the Union or domestic sources is available in the short term; and

(c) neither the goods nor the products concerned can subsequently be introduced into the customs territory of the Union.

The request shall be accompanied by a binding transition plan setting out a phased timetable for progressively reducing dependence on the imports concerned, with measurable indicators, in line with the environmental objectives of this Regulation.

The Member State shall notify the Commission and the other Member States of the request sufficiently in advance specifying the products, territories, justification, and measures aimed at preserving the integrity of the CBAM and preventing any form of circumvention.

The Commission shall adopt a decision authorising or refusing the request within two months of its submission. Any authorised temporary derogation shall be strictly product-specific and shall be granted for a maximum period of two years.

The Commission shall ensure that all temporary derogations granted under this paragraph remain necessary, proportionate, and consistent with the environmental integrity of the CBAM and the proper functioning of the internal market.

The Member State concerned shall submit to the Commission a regular monitoring report, at least every six months, demonstrating how the temporary derogation remains necessary and does not impair the integrity of the CBAM nor the achievement of its goals.

The Commission is empowered to adopt delegated acts in accordance with Article 28 in order to supplement this Regulation by laying down requirements, procedures and deadlines for the submission of such requests for temporary derogation, including the list of admissible evidence and indicators, to ensure the application of this Regulation. The first of these delegated acts shall be adopted five months prior to the entry into force of Regulation /..... [this amending Regulation].'

S&D, PPE, PfE:

Amendment 7

First part 'Regulation (EU) 2023/956 should take due account of the special characteristics and constraints of the outermost regions of the Union, as referred to in Article 349 TFEU, linked to their remoteness, insularity, small size, topography and climate. In order to avoid disproportionate administrative and economic burdens, while preserving the integrity and environmental objectives of the CBAM, the Commission should be empowered to grant, on a duly reasoned request from the Member State concerned, a temporary and product-specific temporary derogation of the obligations laid down in that Regulation for operators established in outermost regions located more than 3 000 nautical miles from the European continent, having limited access to Union supply chains and which remain heavily dependent on imports from third countries for the supply of certain products covered by that Regulation. Any temporary derogation should be subject to a prior assessment by the Commission on a case-by-case basis, taking into account criteria such as the distance from the European continent, the specific conditions of supply, market size, logistical constraints, the risk of circumvention and the need to ensure a level playing field.' without the words: 'temporary and product-specific temporary' and 'located more than 3 000 nautical miles from the European continent'

Second part 'temporary and product-specific temporary'

Third part 'located more than 3 000 nautical miles from the European continent'

Fourth part 'Any temporary derogation should be strictly limited to what is necessary and proportionate to address the structural constraints of such regions, and should not create a risk of circumvention of the CBAM, including through diversion or re-export.'

S&D, ECR, PPE:

Amendment 83

First part Text as a whole without the line: '2905 11 00 – Methanol Carbon dioxide'

Second part that line

Miscellaneous

Amendments 93 and 95 had been withdrawn.

Amendment 106 had been declared inadmissible.

Second part those words

Amendment 38

First part	'By 31 March 2028, the Commission shall carry out a comprehensive assessment and submit to the European Parliament and to the Council an interim report on the performance and effectiveness of the Fund in: (a) preventing carbon leakage, including by assessing whether the current scope of eligible goods and sectors adequately reflects the sectors exposed to a risk of relocation of production outside the Union; (b) supporting the level playing field of Union producers in third markets, and all goods covered by Directive 2003/87/EC and Regulation (EU) 2023/956, (c) achieving verifiable emission reductions. The interim report referred to in the first subparagraph shall evaluate in particular: (a) the adequacy of the scope of this Regulation in terms of eligible goods or sectors on the basis of an updated assessment of the remaining risk of carbon leakage from those goods or sectors; (b) the adequacy of the financial resources allocated to the Fund in light of its objectives and whether the available appropriations are commensurate with the demand for support by the sectors and installations concerned, on the basis of the applications received;' without the words: '(c) achieving verifiable emission reductions'				
Second part	'(c) achieving verifiable emission reductions'				
Third part	'(c) consistency of the Fund with Union climate objectives, State aid rules, and the Union's international obligations; (d) the appropriateness of introducing a targeted transaction fee on the secondary EU ETS market, its effect on price stability and expected revenues for the Fund; (e) an assessment of the effectiveness and added value of using the remaining funds of the Fund to contribute to the Union's international climate obligations under Article 9 of the Paris Agreement.'

ECR: Amendments 58, 60, 65, 72, 73, 78, 80, 82, 86, 88, 92, 94

Requests for split votes

PPE:

§ 27

First part Text as a whole without the words: ‘without abolishing anonymity’ and ‘stresses that measures targeting inauthentic accounts must not undermine the ability to remain anonymous online, which is essential for protecting journalists, activists, marginalised communities and individuals in vulnerable situations (such as whistle-blowers, dissidents and political opponents of autocratic regimes), and should continue to allow space for satirical and humorous accounts;’

Second part ‘without abolishing anonymity’

Third part ‘stresses that measures targeting inauthentic accounts must not undermine the ability to remain anonymous online, which is essential for protecting journalists, activists, marginalised communities and individuals in vulnerable situations (such as whistle-blowers, dissidents and political opponents of autocratic regimes), and should continue to allow space for satirical and humorous accounts;’

§ 115

First part ‘Considers sanctions against individuals and state and non-state entities engaged in actions aimed at undermining the democratic integrity of the EU or its Member States to be an essential component of the European Democracy Shield’s toolbox; further stresses that effective sanctions must be adopted based on objective and consistent criteria and must include a comprehensive set of measures, including asset freezing and confiscation, clear attribution and public exposure, cost increases and revenue cuts, bans on imports and exports, travel bans, the denial of access to EU markets and financial systems, and other effective, robust and impactful restrictive measures;’

Second part ‘reiterates its call on the Council to gradually transition to qualified majority voting for decisions in areas of the common foreign and security policy such as sanctions;’

Recital BK

First part ‘whereas fossil-free energy is a crucial stepping stone for Europe’s energy sovereignty;’

Second part ‘whereas according to analysis published in 2025 by Wood Mackenzie, 9 of the 10 largest global solar inverter suppliers were based in China; whereas hidden communication devices have been discovered in Chinese-made solar power inverters used in Europe and the United States; whereas according to the Czech cybersecurity office, there are risks regarding data protection and, in extreme cases, remote manipulation of solar inverters; whereas solar power plants interconnected through a decentralised dense network are susceptible to cyberattacks and therefore require adequate cybersecurity safeguards;’

ESN:

§ 9

First part Text as a whole without the words: 'considers that the establishment of the Centre as a permanent structure by a legal act would represent a qualitative shift from fragmented coordination towards a more integrated, operational and strategic EU-level capacity;'
Second part those words

§ 15

First part Text as a whole without the words: 'stresses, however, that their primary responsibility does not exhaust the EU's legitimate interests with regard to countering FIMI and disinformation and strengthening electoral integrity;'
Second part those words

§ 32

First part Text as a whole without the words: 'calls on platforms to publicly disclose remuneration flows and their beneficiaries, at least once a year;'
Second part those words

§ 34

First part Text as a whole without the words: 'underlines, in this context, that the EU must continue to actively counter false narratives that claim that its digital and democratic legislation undermines freedom of expression;'
Second part those words

§ 50

First part Text as a whole without the words: 'such as LGBTIQ+, gender equality and anti-racism issues;'
Second part those words

§ 80

First part Text as a whole without the words: 'and should not adversely affect the right to seek asylum'
Second part those words

§ 101

First part Text as a whole without the words: 'local', 'regional', 'national' and 'and in candidate countries'
Second part 'local'
Third part 'regional'
Fourth part 'national'
Fifth part 'and in candidate countries'

Amendment 51

First part 'Strongly condemns the instrumentalisation of migration by third countries or hostile non-state actors with the aim of destabilising a Member State or the EU; takes the position that this phenomenon constitutes an unacceptable attempt to exert political pressure on front-line Member States and on the EU; urges the Commission to propose further legislation enabling Member States, in cases of instrumentalisation, to refuse access to asylum procedures at the external border, in accordance with EU and international law; notes the specific provisions on the instrumentalisation of migration recently included in key pieces of EU legislation; further welcomes the recent revision of the EU legal framework to include hybrid threats among the grounds triggering the EU visa suspension mechanism; underlines that a credible and effective EU response must also be based on close coordination and sincere cooperation between neighbouring Member States, and between them and EU institutions, in a spirit of loyalty and mutual solidarity, and on enhanced technological and operational capabilities in border management, while preserving the integrity of the Schengen area and ensuring full respect for the fundamental values of the EU;'
Second part those words

Recital J

First part	'whereas the principle that industries should contribute financially to addressing externalities related to their activities is well-established in Union law and practice; whereas under the Extended Producer Responsibility framework, certain producers are required to finance the management of the waste generated by their products, in direct application of the polluter-pays principle; whereas under the Single Resolution Mechanism, all banks operating in the banking union make annual contributions to the Single Resolution Fund so that the systemic risks related to their activities do not fall on taxpayers; whereas pharmaceutical companies are required to fund post-authorisation safety studies, on the basis that those who profit from placing a product on the market must contribute to monitoring the harms it may cause;'
Second part	'whereas this logic should apply to large information society service providers who benefit from the information ecosystem while simultaneously creating systemic risks to democratic integrity;'
Recital O	
First part	Text as a whole without the words: 'as evidenced by the amplification of extremist political content during elections across the EU'
Second part	those words
Recital R	
First part	Text as a whole without the words: 'thereby exposing themselves to risks linked to addictive design, harmful content and manipulative practices'
Second part	those words
Recital BT	
First part	'whereas Russia's war of aggression against Ukraine and China's assertive geopolitical posture have intensified the use of disinformation, economic coercion and strategic influence, targeting not only the EU, but also vulnerable regions such as the Western Balkans, Eastern Partnership countries and the Global South; whereas various sources reveal that Russia's annual budget for spreading disinformation and propaganda amounts to several billion euro; whereas Russia's disinformation warfare has not been matched by the EU with adequate financing or effective strategy; whereas elections and political events across Europe demonstrate persistent, targeted and sophisticated full-scale offensive hybrid warfare perpetrated by Russia, aiming to destabilise trust in European political systems and institutions, and to create constant confusion between facts and false information;'
Second part	'whereas such warfare requires an appropriate response and a shift from a mere defensive strategy to an offensive one;'
The Left:	
Amendment 25	
First part	'Reiterates that Members of the European Parliament must act in accordance with the Code of Conduct for Members of the European Parliament regarding integrity and transparency;'
Second part	'recommends in this regard that an audit be performed on the general allowance of and all other forms of financial contributions to Members of the European Parliament on a yearly basis in order to increase Parliament's transparency and trust in its Members among the citizens of the EU as well as reduce the risk of undue influence, interference or corruption;'
